

11. (AMENDED ONCE) A method for using a positioning system comprising:
transmitting signals from one or more satellites;
transmitting an assistance signal from a broadcast station; and
receiving said satellite signals with a receiver and using only said assistance signal [with
a receiver] when said satellite signals have inadequate SNR.

21. (AMENDED ONCE) A computer program product comprising:
a computer usable medium having computer readable program code embodied therein
configured to find the position of an object [,] using said computer program product comprising:
[computer readable code configured to cause a computer to transmit signals from one or
more satellites;]
computer readable code configured to cause a computer to transmit an assistance signal
from a broadcast station; and
computer readable code configured to cause a computer to receive with a receiver [said]
satellite signals transmitted from one or more satellites and use only said assistance signal [with
a receiver] when said satellite signals have inadequate SNR.
